

Kitchen & Inventory User Guide

Better Fork Restaurant Limited

SmartPOS · Menu · Recipes · Raw Stock · Kitchen Production · POS

A practical guide for cafeteria staff on managing food items, ingredients, cooking batches, and sales.

1. Who Can Do What?

Role	Menu & Recipes	Inventory	Suppliers	POS
Restaurant staff	Full access	Full access	Full access	Yes
Finance	View only	View only	View only	No
Admin	No*	View + suppliers	Full access	No

* Use a restaurant staff account for daily menu and kitchen work.

2. How It All Connects

- Add suppliers !' Record raw stock deliveries
- Create menu items !' Link recipes with batch size
- Cook batches on Kitchen tab !' Sell on POS
- Stock and sales are tracked automatically

Example — Mandazi: Add flour to raw stock !' Create Mandazi at KES 50 !' Recipe: 1 kg batch !' Sell on POS.

3. Suppliers (Start Here)

Go to: Sidebar !' Suppliers

- Click Add Supplier and enter business name (required), contact, phone, email, address.
- When recording deliveries, pick the supplier under Inventory !' Raw Stock !' Stock

4. Raw Stock (Ingredients)

Go to: Inventory & Kitchen !' Raw Stock tab

Add a new ingredient

- Item Name — e.g. Baking Flour
- Category — Grains, Vegetables, Meat, Dairy, Spices, Other
- Unit — kg, liters, pieces, bags
- Reorder Level Alert — triggers low-stock warning
- Unit Cost (KES) — for stock valuation. Click Add Inventory Item.

Record a delivery (Stock IN)

- Adjustment Type !' Stock IN (+)
- Reason !' purchase
- Select supplier and optional invoice number. Click Record Stock Movement.

Record usage or spoilage (Stock OUT)

- Adjustment Type !' Stock OUT (-). Reason: usage, spoilage, or adjustment.

Watch for the amber Low Stock Warning banner and restock before cooking.

5. Menu Management

Go to: Sidebar !' Menu Items / Categories / Add Menu Item

Create categories first

- Menu Categories tab !' enter name (Breakfast, Lunch, Snacks) !' Add Category.

Add a menu item

- Item Name, Price (KES), Category (required). Image and description optional.
- Stock (portions): leave blank for unlimited, or set a fixed count.

Manage items (All Items tab)

- Available / Unavailable — toggle POS visibility

- Edit, Recipe, or Delete as needed

6. Recipes & Batch Cooking

Go to: Sidebar !' Menu Recipes

- Select Dish !' set Batch yield (portions per cook), e.g. 60 mandazis.
- Add ingredients per batch — pick from raw stock with quantity.
- Save Recipe. Item starts at 0 portions until you cook a batch.

7. Kitchen — Cook & Track Sales

Go to: Inventory & Kitchen !' Cook & Track Sales tab

Label	Meaning
Raw stock	How many batches you can cook now
Ready (POS)	Portions ready to sell
Sales made	KES sold from current batch
Still expected	KES left to hit batch target

- Click Cook 1 batch when ingredients are available.
- Success: portions added to POS. Failure: restock ingredients first.
- Use Refresh to update the board during service.

8. Selling on POS

Go to: Sidebar !' POS Terminal

How stock deducts

- Batch items: ingredients used when cooking; POS sales reduce Ready (POS) count.
- Pre-packaged items: stock decreases by 1 per sale; update manually when restocking.
- Unlimited items: leave stock blank — always available.

Checkout flow

- Filter by category or search !' tap items to add to cart.
- Students: search by name/reg no !' Complete Sale (Wallet).
- Guests: Cash (Guest) or M-Pesa STK (Guest).

9. Daily Workflow

Morning

- Confirm suppliers exist. Record deliveries (Stock IN / purchase). Check low stock.

Before service

- Confirm recipes. Cook 1 batch for each dish. Set items to Available.

During service

- Serve on POS. Watch X left / Out badges. Cook more batches when low.

End of day

- Review Sales Tracker. Record spoilage/adjustments. Check supplier purchase history.

10. Quick Reference

Task	Where to go
Add ingredient	Inventory ! Raw Stock ! Add Inventory Item
Record delivery	Inventory ! Raw Stock ! Stock IN (+)
Add menu dish	Menu ! Add Menu Item
Link recipe	Menu ! Menu Recipes
Cook food	Inventory ! Cook & Track Sales ! Cook 1 batch
Sell food	POS Terminal
Check sales	POS ! Sales Tracker
Add supplier	Suppliers ! Add Supplier

11. Common Issues

Problem	Fix
Item shows Out on POS	Cook a batch or increase stock on menu item
Not enough ingredients	Record delivery under Raw Stock (Stock IN)
Unavailable after recipe	Cook 1 batch first — starts at 0 portions
Low stock warning	Restock via Stock IN (+) / purchase
No supplier on purchase	Add supplier under Suppliers first
